

# Premium H13 SuperMelt

OUR **H13 SUPERMELT** IS AN ULTRA-HIGH QUALITY PREMIUM MELTED AISI H13 HOT WORK TOOL STEEL. IT IS AVAILABLE IN BOTH PLATE AND BLOCK FORMS.

### OUR PREMIUM H13 SUPERMELT IS EXPERTLY FORGED AND:

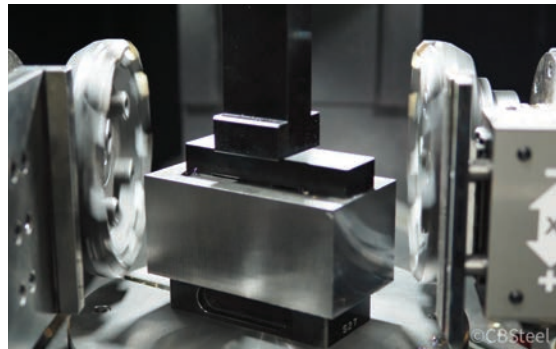

- Meets or Exceeds NADCA #207 Specifications
- High Impact Resistance
- High Temperature Resistance
- High Heat Check Resistance
- Great Wear Resistance
- Good Machinability
- Mold Quality
- DFARS Compliant
- Capable of 42 to 52 Rc.

H13 SuperMelt excels in high pressure die casting applications and forging dies and tooling.

It has also become a coveted material for complex high performance plastic injection molds because of its toughness, wear resistance, and polish ability.

H13 SuperMelt is also widely used in hot stamping applications and other forming and trimming tooling due to its terrific strength, toughness, and temper resistance.
